

# IMIS Global Limited

## Press release

Date **April 2008**

IMIS Global Limited has completed an upgrade of the Shipping and Signalling Services [S&SS] **MariWeb™** network in Belgium.

The S&SS system has been upgraded to now include the latest ITU-R.M1371-3 message set and a 5TB **MariWeb™ Archive Server [MAS]** has been included.

The MAS stores all historical AIS data and makes it available to operators to do searches or create reports without having to load the data using different media.

The MAS allows the creation of DVDs with all or sub-sets of the AIS data that has been received on the system.

The S&SS system tracks more than 1,000 AIS targets on a daily basis and assists in providing information on the long approach to the ports along the approach to Antwerp.

Open interfaces are in place that integrate the **MariWeb™** system with existing legacy information systems.

[IMIS Global Limited details](#)

**MariWeb™** is the flagship product of IMIS Global Limited.

IMIS Global Limited has offices in the United Kingdom, Greece, the USA and South Africa. To make initial contact with IMIS Global Limited please do so here:
