

# IMIS Global Limited

## Press release

Date February 2009

IMIS Global Limited has completed the upgrade of the **San Francisco Bay Marine Exchange Maritime [SFMX] Information Management System [MIMS]** that is based on the IMIS Global Limited **MariWeb™** product to now include the entire ITU-R.M1371-3 message set. This ensures that all of the valuable data available in the AIS reports is available to SFMX.

The SFMX MIMS environment is critical to the daily operations of the San Francisco Bay maritime community. The system collects and disseminates information with regard to all arrivals, departures and shifts for all ports within the San Francisco Bay conurbation.

The SFMX MIMS environment is used to produce a range of daily reports that are distributed by various means to the port community.

IMIS Global  
Limited details
